International Tourist Arrivals To Thailand By Country of Residence 2007

Total : 14,464,228 (+4.65%)

Thailand's dynamic tourism industry enjoyed yet another magnificent year in 2007. Despite negative factors like rising oil prices and economic downturn in some important markets, a concerted cooperation between the Tourism Authority of Thailand (TAT) and its allies in both the public and private sectors in launching the "Amazing Thailand" campaign turned out productive and successful, with qualitative as well as quantitative targets being attained.

In 2007, there were 14.46 million international tourist arrivals to Thailand, an increase of 4.65 percent over the previous year. A total revenue of 547,782 million baht was generated, equivalent to an increase of 13.57 percent. Meanwhile, more national tourist traffic was stimulated by domestic marketing resulting in the rise of 2.14 percent to reach a total amount of 83.23 million person/trips, generating an income circulation of 380,417 million baht, which represented a growth of 4.15 percent.

Through its partnership with leading players in the international travel business to position Thailand as a quality tourist destination, TAT was able to achieve for Thailand sustained expansion in two key areas: Average tourist expenditure and number of high-end travelers. According to a survey of tourist expenditure in Thailand carried out by VISA Inc., the total spending by international visitors to the country using a VISA credit card, especially the Gold/Platinum Class, was as high as 24,530 million baht (US\$ 710 million), representing a rise of 11 percent over the previous year.

Various aspects of Thailand's tourism statistics in detail have been compiled in this Statistics Report 2007, such as the Overview of Thailand's Tourism Industry, International Tourist Arrivals, Outgoing Thai Travelers, Air Traffic, Tourism Receipts and Expenditure, Tourism Balance, Accommodation Establishments in Major Cities, as well as Domestic Tourism.

It is hoped that the compiled statistical data would prove beneficial and serve as a good source of information anyone interested in the performance, past and future of the kingdom's tourism industry.

Tourism Situation of International Tourist Arrivals to Thailand 2007

Overview of World Tourism

In 2007, the growth of international tourists around the world was 6%, with 898 million international tourists (higher than in 2006, when the growth of world tourism expanded by 5.5%). This was partly the result of the emergence of new countries in the Asia-Pacific, Africa, and Middle East regions. There were many obstacles in international travelling, such as increased expenses due to the higher fuel cost, variance of the currency exchange rates, as well as incredibility of the economic stability, terrorism, unpredictable weather and epidemics.

In terms of the situation in region, the Middle East had the highest growth in the number of visitors, a 13% increase, with 46 million tourists. This was the result of an expansion of the Middle East market. In addition, the Asia-Pacific was ranked second, with a 10% increase, and 185 million tourists, due to the drive from China and India markets which have rapid economic growth. In Africa, an 8% increase or 44 million tourists showed an extended growth from the previous year. In America, the growth rate was not much different from the previous year, with a 5% increase or approximately 142 million tourists. It resulted from an increased number of American tourists who preferred travelling to intra-regional destinations almost in double increase. In Europe, there was a 4% increase, equal to 480 million tourists, due to the strength of the economic growth and expansion of low-cost airlines. In addition, the convergence into the European Union of 9 European countries: Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, and Slovenia in 2007 helped intra-regional travels to be more convenient.

International Tourist Arrivals to Thailand

The situation of international tourist arrivals to Thailand in 2007 had moderate growth, at the rate of 4.65%, constituting 14,464,228 tourists. It was the result of the political problems in the country; such as, the several bombings in Bangkok and peripheral areas during the New Year Eve, which led to the unreliability to visit Thailand among international tourists, especially in the East Asia market. Although the occurrence did not impact on other markets, there were also other factors which discouraged international inbound visits, such as, the USA's economic downturn, unpredictable weather and terrorism in Europe. All of these problems resulted in the lower number of international tourist arrivals to Thailand during the first to third quarter of the year than expected. However, in the fourth quarter, the inbound visitors recovered nearly comparable with the target. Therefore, most markets had a higher growth rate as follows: Oceania (+16.59%), South Asia (+13.27%), Middle East (+11.84%), Africa (+11.16%), Europe (+11.08), and East Asia (+0.49%), while America experienced a lower rate (-0.92%). The preliminary receipt from international tourist arrivals was 547,782 million baht, a 13.57% increase compared with the previous year.

The Movement Situation of International Tourist Arrivals to Thailand in Quarterly

The 1st Quarter of 2007

With the number of 3,831,089 visitors, the country's tourism experienced moderate growth rate, a 5.76% increase. What limited high growth were several bombings in Bangkok and peripheral areas at the end of 2006, causing negative impact in the East Asian market which was sensitive to the crisis and lost their confidence in travelling to Thailand. Consequently, this regional market had a lower growth rate (-4.17%), although the impact did not affect other markets.

The 2nd Quarter of 2007

Thailand experienced the lowest growth rate increase at 0.44%, with 3,123,663 inbound visitors, resulting from the country's political conflict. Therefore, the East Asian market had a growth rate at -3.06%. In addition, there were other factors which also influenced European tourists to decide to travel within their countries; such as, warmer climates and which effect from global warming and the environmental consciousness stimulated tourists to postpone their long-haul journey which could waste a lot of fuel that is one key factor of the global warming. Another key factor was terrorism; for example, the bombing at the Heathrow and Glasgow Airports in the United Kingdom at the end of the second quarter of the year, which resulted in visitors' postponing overseas trips. Moreover, the USA's more severe economic downturn while the dollar currency continued to weaken, it seemed that many American tourists were worried. Therefore, the number of American tourist arrivals to Thailand dropped at 5.76%, while other markets had a normal growth rate.

The 3rd Quarter of 2007

Compared with the previous quarter, the number of visitors slightly increased at a growth rate of 2.69%, or 3,450,768 tourists. It resulted from the recovery of the East Asian market which experienced a positive growth rate, a 1.77% increase, even though the tourism situation in the Europe and America markets still faced a slowdown since the second quarter of the year. Meanwhile, the growth in the Middle East and Africa markets began to decrease, as a result of conflicts in the region. However, the remaining markets still grew at a normal rate.

The 4th Quarter of 2007

Thailand saw the highest growth, with 8.84% increase, or 4,058,708 tourists. Almost all markets had a normal growth rate except the Middle East region whose growth decelerated because of political instability within the region. In addition, the Israel market also experienced an increasing rate of slowdown in this quarter since the report on Israel tourists dying in the boat sunk at Ao Maya, Ko Phi Phi, Krabi province, in September was publicized.

Situation of International Tourist Arrivals to Thailand Categorized by Regions

East Asia

This region had a very low growth rate with a total of 7,981,205 inbound tourists and a growth rate of 0.49%, only higher than the growth rate of the America region. Since it was quite sensitive to crises, that the several bombings in Bangkok and peripheral areas during the New Year Eve, although the tourism was rebounded in the fourth quarter of 2006. Therefore in the first half of 2007, the number of tourist arrivals decreased at a rate of 3.63%, which affected in China, Hong Kong, Japan, Malaysia, Singapore, South Korea, Taiwan, and Vietnam Markets. Although, those markets' growth rate gradually adjusted to be positive in the second half of year 2007, owing to the fact that political conflicts began to unravel and active market promotion was encouraged in many areas. As a result, almost all markets grew positively with a 4.47% increase in growth rate. Nevertheless, the growth rate of the Taiwanese continued to decrease owing to expensive tour packages and increase in the commission rate of the visa application to visit Thailand from 850 Taiwan dollars to 1,100 Taiwan dollars since July 2007. In terms of the ASEAN market, its situation was usually constant with the North East Asia market except the Lao PDR market which had an 84.6% increase in growth, expected to be the result of the opening of the Thai-Lao Mittraphap 2 Bridge in Mukdahan province. Therefore, Laotian tourists had more convenience to pass the Thai border.

Europe

There were 3,689,770 inbound visitors with quite a high tourism growth rate of 11.08%, even though the slowdown remained from the second to third quarter due to the anxiety of safety after the bombings in the United Kingdom and consciousness which global warming. In addition, it influenced most travellers to postpone their long-haul journeys, travelling within the region. However, the tourism situation recovered during the fourth quarter after people's anxiety of their safety decreased and global warming became one major social issue. Furthermore, the outstanding growing markets included East Europe, Russia, and Scandinavia. The main markets of Thailand, including Germany and France, still continued to grow while the United Kingdom market's growth rate was quite stable compared with the previous year.

The Americas

There were 817,564 inbound tourists, dropping at 0.92% due to the USA's economic downturn during the second and third quarter of the year and the US dollar currency's weakness. It resulted in a decrease in the number of tourist arrivals in the North America market, the main market in the region including the USA and Canada with a decreasing growth rate of 2.66% and 0.1%, respectively. However, the situation recovered during the fourth quarter after people's anxiety was relieved and the government launched the measures to deal with the country's economic crisis. Moreover, Thailand's tourism strength was reinforced since it won the Reader's Choice Award 2007 as Asia's Number 1 Attraction from the magazine "Condé Nast Traveller" for three consecutive years. In the part of South America market, the Argentina and Brazil market combination had a prominent and continuous growth all year, resulting from the expansion of the trade and investment sector. Furthermore, the cooperation among South American countries in the establishment of the South American Economic Development Fund contributed to the rapid economic growth of the region and increasing number of outbound tourists.

South Asia

There were 685,574 tourists with a continuous increasing growth rate of 13.27% driven by the expansion of the India market, a potential market in the region which experienced high economic growth. In addition, the route expansion of regular flights and low-cost airlines to other important cities of India encouraged an increased growth rate of the India market at the rate of 17.8%. Although other markets in the region had an unpredictable tourism situation, especially caused by the political conflicts and intra-regional terrorism, it did not affect the overall situation in this market.

Oceania

This region had a growth rate of 16.59% with a total of 731,283 tourists, resulting from the high expansion of the Australia market which held more than 80% of the region's market share. The key factors of its growth were the frequency of flights and Thai International Airways' opening of the new route, Sydney - Brisbane - Bangkok, providing seven flights a week. It did not matter even though there was a warning on the bombings and chaos in Thailand by the Australian and New Zealand governments. However, other competitors such as Bali also operated hard promotions with the hope to recover their tourism.

Middle East

There were 453,891 tourists with an increasing growth rate of 11.84%. Compared with the previous year, the growth declined although this market had economic strength due to the export of fuel and the expansion of flight routes. The major factors might be the conflicts within the region, especially when the conflict between the US and Iran seemed to be more severe. In addition, there were also fighting and bombings between Israel and Syria which caused a lot of deaths during September, the month of Ramadan. It greatly affected the tourism atmosphere in overseas markets. Most Arabian tourists decided to travel to intra-regional destinations and attend Muslim religious rituals in Saudi Arabia. The major factors which enhanced the intra-regional tourism included many foreign countries' policy to prevent Arabian tourists to visit their countries and the frequency expansion of Etihad Airways' flights to Arabian countries. For instance, flights from Abu Dhabi to Jeddah increased double and flights from Abu Dhabi to Medina increased about 2 flights a week during the fourth quarter. In addition, there was a slowdown in travelling to Thailand among Israeli visitors, believed to be the result of the news report of the dead Israeli tourists in the boat sunk at Ao Maya, Ko Phi Phi, Krabi province.

Africa

There were 104,941 tourists with an increasing growth rate of 11.16% due to supporting economic factors and the policy of an open aviation area. Therefore, in the first half of the year 2007, African tourists in Thailand increased continuously from the previous year at the rate of 17.97%. However, there was a slowdown in the second half of the year with the growth rate of only 6.02% due to the disturbance in the region when people in South Africa participated in the demonstration because they were not satisfied with the government's decision on residence and infrastructure problem solving.

SECTION 2: AIR TRAFFIC

This was accounted for 81.69% of total international tourist arrivals to Thailand. However, there was a change in immigration procedure from The Immigration Bureau this year to use "First Port of Arrivals" system, which could affect the statistic comparison with the same period of last year. In addition, the number of tourist arrivals at Suvarnabhumi Airport was the highest, totaling 10.37 million, followed by Phuket, Chiang Mai, and U-Tapao, respectively.
